ENGINEERING

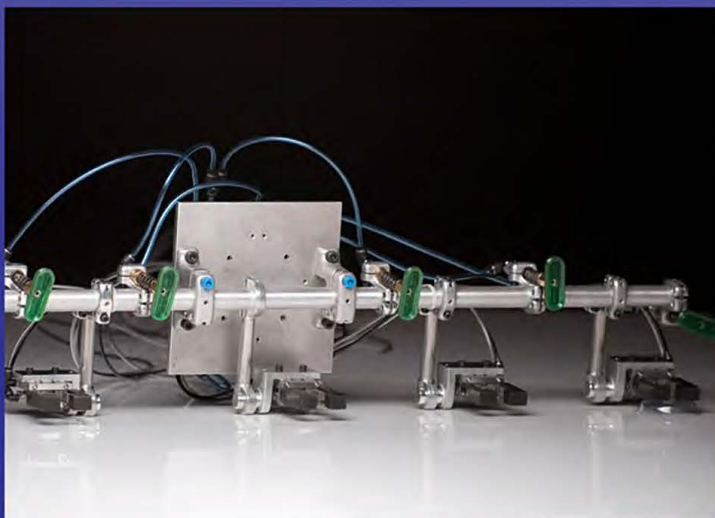

**AFS is a custom automation,
fabrication, and machine
manufacturer specializing in vibratory
feeder bowls (systems) and parts
handling/transferring equipment.**

Bilsing Automation has over 40 years' experience in automotive stamping and bodyshop applications, as well as in developing material handling solutions for injection molding, fabrication, packaging, hydroforming and non-automotive applications.

CE CONTROLS ENGINEERING

Controls Engineering has spent over 10 years developing better banding systems for a range of industries and applications that provide secure material packaging and movement without band breakage, product damage, or the difficulty in removing the bands common among conventional banding materials

For over 30 years, Coval has developed personalised vacuum handling and holding solutions for the aerospace, automotive, agrofood, packaging and plastics processing industries

LeakMaster

LeakMaster has built its reputation on innovating the industry's fastest and most repeatable leak testing equipment. It's a well-deserved reputation they pledge to maintain by continuing to provide innovative leak testing solutions.

MONTTECH[®]

Montech is a Swiss technology company specializing in the industrialization and standardization of advanced and exceptional conveyors, transfer systems and innovative aluminium framing systems for a broad and diverse range of applications.

NACHI

ROBOTIC SYSTEMS, INC.

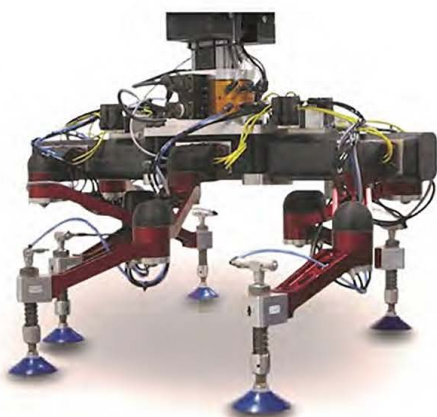

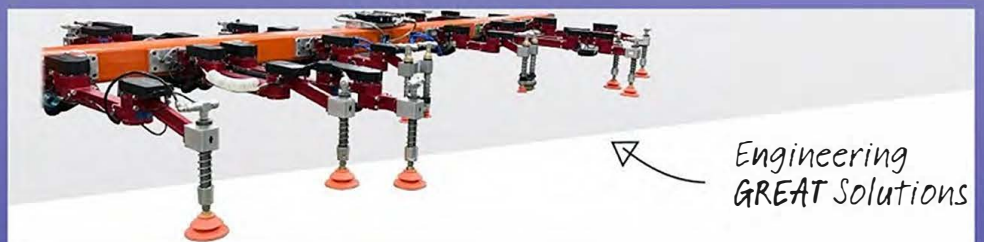

Leading Supplier of Industrial Robotics for palletizing, spot welding, material handling, dispensing, as well as collaborative robots

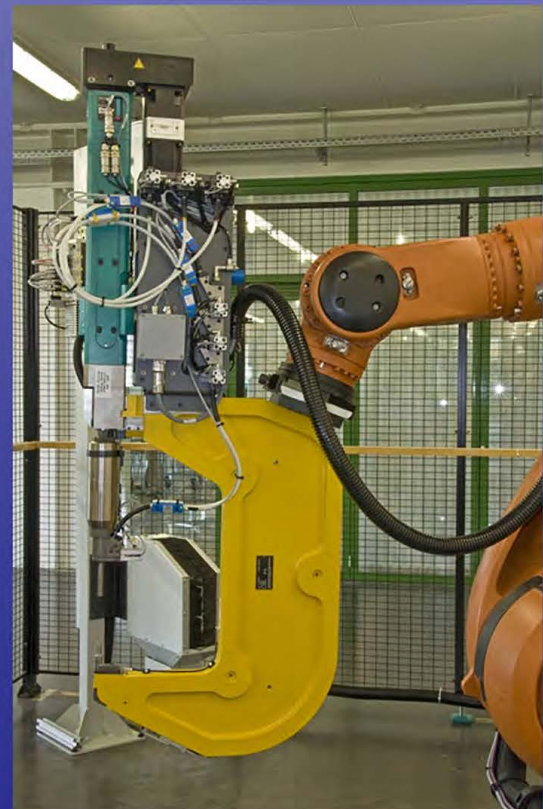

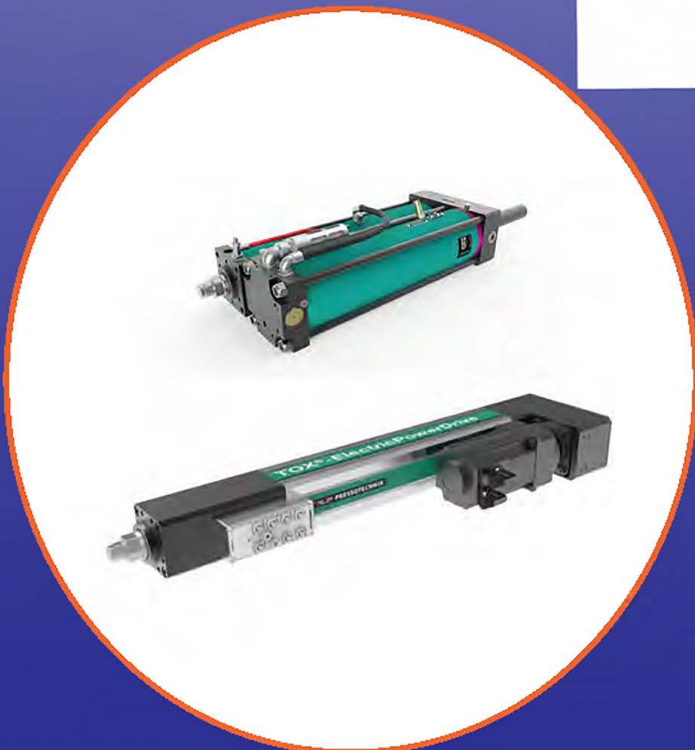

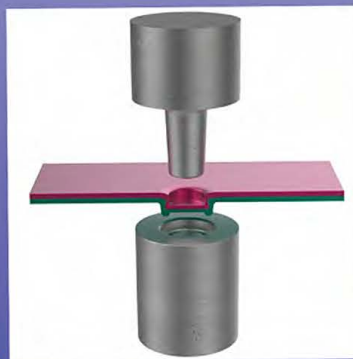

NORGREN®

A world leader in fluid and motion control technologies, delivering exceptional solutions which improve the productivity and efficiency of our customers' equipment.

TOX[®] PRESSOTECHNIK

Manufacturer of pneumohydraulic and servo press drives for a variety of applications, such as: clinching, assembling/press fitting, fastener insertion, coining/markings, riveting/ crimping, and pressing/compressing

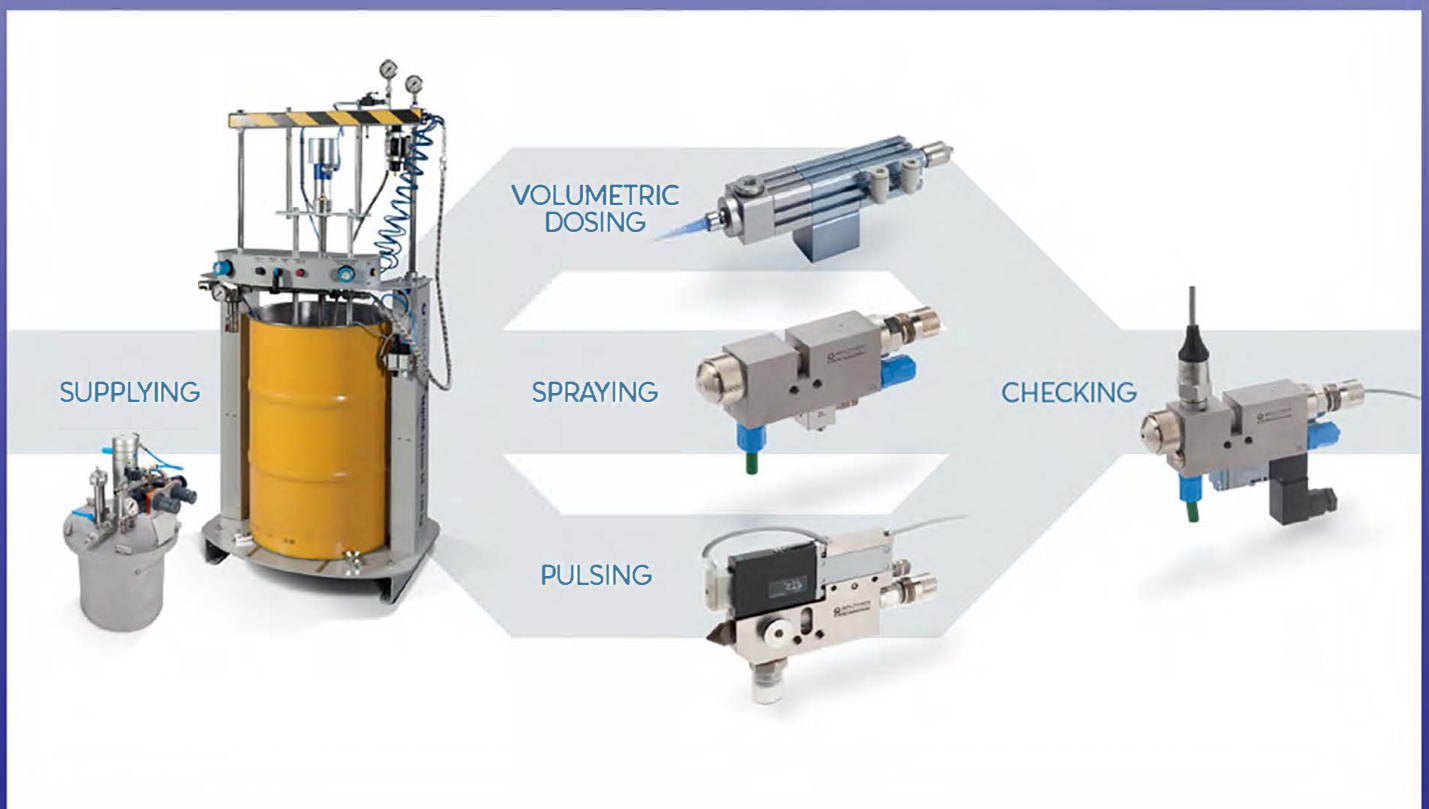

WALThER SYSTEMTECHNIK

METERING & DISPENSING SYSTEMS FOR LIQUIDS AND HIGH-VISCOSITY MEDIA

A partner to the manufacturing process regarding the dosing and application for greases, oils, and other media. We develop and build turn-key systems and supply components for numerous dosing applications for the manufacturing industry worldwide.

Over 45 years experience designing and manufacturing durable automation components and bearings. Welker produces standard components for locating, clamping, sliding, lifting, ejecting, transporting, stopping, and rotating applications
